REPUBLIC OF YEMEN
UNIVERSITY OF IBN KHALDOUN
FACULTY OF ENGINEERING
Department of Civil Engineering

Mark: _____

Period : 1 hour

Date: 1 /12/2010

General Chemistry Test-1

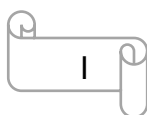

Write all the questions below (it is allowed to use calculator)

Q.1

(a) *Classify the below properties as extensive properties or intensive properties*
boiling point ,energy, volume, density, odor , concentration , mass

Extensive Properties	Intensive Properties

(b) Draw the scheme for classification of matter

Q.2 Put true (T) or false (F) and correct the false statement:

(a) The neutron was discovered by Millikan ()

(b) During a chemical reaction, the total volume of the substances involved does change.
()

(c) The basic unit of amount of substance in the SI system is g
()

(d) 0.50170×10^{-3} g contains 5 significant figures
()

(e) A Plasma state is a special state accrues when atoms of gases ionize to give gases ionized. ()

Q.3 (1) Perform the following conversion:

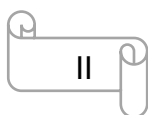

(a) $22 \text{ cm}^3 = ? \text{ nm}$

(b) $12 \text{ in.} = ? \text{ m}$

(c) $400^\circ\text{F} = ?^\circ\text{K}$

(2) Calculate then round the answer to the proper number of significant figures:

(a) $26.5 \times 5.00 =$ ()

(b) $21.898 - 31 =$

()
